AI summary

Apple Inc. reported strong financial results for Q3 2026, achieving a June quarter record revenue of 109.4billion—up16109.04 billion. The company's net profit climbed to 29.789billion, or2.02 per share, compared to 23.434billion, or1.57 per share, in the prior-year period. Top-line growth was fueled by June quarter revenue records in iPhone sales (54.3billion, up2210.4 billion, up 29% year-over-year), despite experiencing supply constraints. Amid attention surrounding its AI developments, Apple's market capitalization reached \$4.90 trillion, reclaiming its spot as the world's most valuable company. Wall Street responses were somewhat mixed following the developments, with JP Morgan issuing a Buy rating while Jefferies and UBS maintained Neutral ratings.

Overall, the tone of the recent news is predominantly positive.
